

18 STEERING WHEEL

18.1 Stalks and steering lock(golf) usually used on super six –R6 –B6

What you need:

wiper switch

indicator switch

Steering lock

Cap 8mm x 15

- the steering lock is held in place with a single cap head 8mm.
- the stalks have plastic connectors already on loom for each switch.

18.2 Boss and Wheel (mountney)

What you need:

Steering wheel boss.

Steering wheel.

1 x fixing nut for boss.

6 x M6 x 15mm bolts with nuts.

The boss sits over the steering column in order to convert it to the non-standard steering wheel.

- Slide the boss over the end of the splined shaft

- Secure the boss to the shaft using the nut and tighten.
- Fix the center to the boss by pushing it on.
- Secure the steering wheel to the boss using the M6 nuts and bolts provided.

The steering wheel can be “centered” after the tracking has been carried out.
